Welcome to the Club!

SCROO-G

A club for those with ~~BALLS~~ EGGS.

A juicy mix of GameFi, SocialFi, NFT and DeFi for fun and profit in one place.

Scroo-G is the world's first Web3 arena on the TON network, featuring a wide range of farming games, all types of competitions, and multiple ways to earn cryptocurrency.

Scroo-G Ecosystem:

- Web3 App on The Open Network and BNB Smart Chain
- Telegram Mini App
- Decentralized duels between content creators (including NFT battles)
- Mini-games and point farming to snag those token airdrops,
- Attractive referral and ambassador programs,
- A growing decentralized ecosystem for competitions and crypto earnings across all major networks.

Concept:

The core idea is competition and rivalry among those who want to prove something to their opponents by any means. Scroo-G's earning model evolves from Play2Earn, transforming into Play and Earn, where the game is more than just an add-on, ultimately leading to Event2Earn as its own model.

Web3 Arena:

1. Currently, Scroo-G's arena includes 🥚EGGS points farming in the Telegram Mini App for $SCRG token airdrops, as well as USDT duels in the decentralized web app on BNB Smart Chain and The Open Network (TON).

2. **Web3 App** — a unique product under development since 2022:
- Successfully closed MVP beta testing on BNB Smart Chain in 2024
- Decentralized duels between content creators (including NFTs)
- USDT on BNB Smart Chain or The Open Network
- Live streaming through YouTube or Twitch channels
- Participation as spectators and voting for duelists, with the opportunity to earn from their victory
- Animated reactions and chat comments in challenges
- Fully decentralized process — calculations and payments are governed transparently by smart contracts

3. **Telegram Mini App** — Launched in May 2024, attracted over 150,000 users in less than 3 months without marketing. In July 2024, it received an update where users can:

- Earn 🥚EGGS points by playing games to receive $SCRG token airdrops
- Upgrade their farm to passively earn 🥚EGGS points
- Gain game bonuses and extra points by inviting friends to play games
- Complete tasks and build a team to earn more 🥚EGGS points
- Participate in events and tournaments
- Become a project ambassador

All 🥚EGGS points will be converted into $SCRG token airdrops for active players in the Scroo-G Mini App.
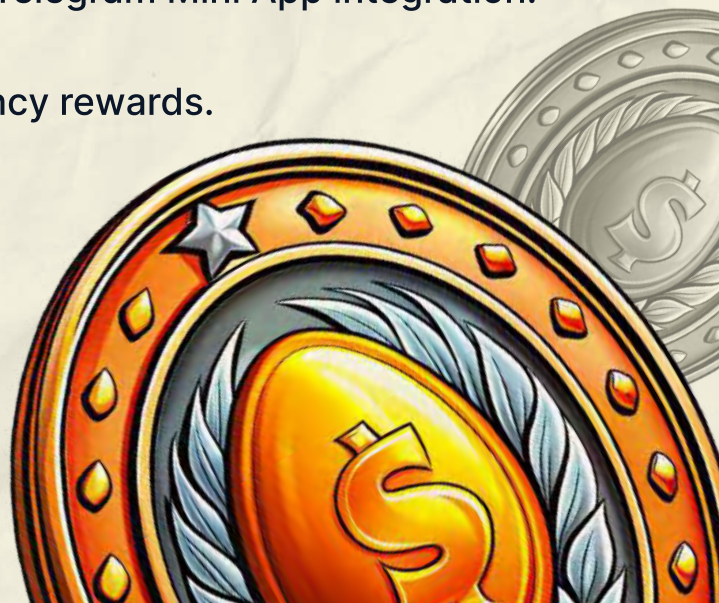

$SCRG Token:

1. Utility:

- Cross-chain crypto exchanges
- Donating in challenge votes
- Using in games and competitions
- Shopping in the marketplace
- Farming and staking
- Minting NFTs
- Participating in Scroo-G's DAO

2. Token Distribution:

- TGE
- DEX and CEX liquidity provision
- Marketing
- Staking pool
- Liquidity boost pools
- Rewards
- Airdrop
- Team and project development

3. As the $SCRG token is introduced, Scroo-G Mini App will continue to engage Web2 audiences into Web3. The new Web3 Telegram Mini App will be synchronized with the Web3 App into a unified ecosystem:

- Web3 Telegram Mini App, Web3 App, and Telegram Mini App integration.
- Duels across all major networks.
- Competitive mini-games with cryptocurrency rewards.
- Event predictions.
- $SCRG token farming and staking.
- Partnership programs.
- Tasks and quests.
- Tournaments and events.
- Live streams with crypto donations.

SCROO-G

Partners:

Clarnium — A unified space for Web3 gaming, ranked among the top promising projects at Paris Blockchain Week.

NAKOMOTO GAMES — A game development studio specializing in multi-platform Web3 games, from mobile to PC and console gaming.

Team:

- ✅ Over 20 years of experience in commercial development, spanning from Web1 to Web3.
- ✅ More than a decade of working with blockchain technology.
- ✅ Launched over 10 successful commercial projects.
- ✅ Pioneered mobile games in the Web3 space.
- ✅ Extensive experience in scaling fast-growing projects.
- ✅ Proven track record in GameFi, DeFi, and Market Making (MM).

Why the project is interesting:

- ⭕ A powerhouse dev team with deep roots in GameFi, DeFi, and MM, with a track record of success.
- ⭕ $250K of own cash invested.
- ⭕ $500K raised in two private rounds.
- ⭕ MVP version of decentralized challenges live on The Open Network and BNB Smart Chain.
- ⭕ Telegram Mini App loaded with mini-games to farm points for the upcoming project token airdrop.
- ⭕ Partnerships with Tier-1 market maker on TON.
- ⭕ A broad network of collaborations with top players in the TON ecosystem.
- ⭕ Native utility token to power the whole thing.
- ⭕ An exclusive NFT collection giving the community extra game perks.
- ⭕ DAO governance for NFT holders.
- ⭕ CEX listings coming up.
- ⭕ The best ambassador program and KOL terms in the market.
